

SUMMARY

Junior Software Developer with professional internship experience building production-ready applications using TypeScript, JavaScript, React, Next.js, and REST APIs. Delivered 5+ application features and 10+ reusable UI components, with experience in API integration, authentication, validation, testing, debugging, and relational databases. Recent Mobile Web Developer graduate with Honours and a 98% GPA, experienced across the software development lifecycle, Agile workflows, web and mobile development.

SKILLS

Programming: TypeScript, JavaScript, Swift, Kotlin, PHP
Web Development: React, Next.js, Angular, HTML5, CSS3, Responsive Design
APIs & Databases: REST APIs, API Integration, Authentication, MySQL, PostgreSQL
Mobile Development: SwiftUI, iOS Development, Android Development, React Native, Core Data, MVVM
Testing & Debugging: Functional Testing, Regression Testing, API Testing, Validation, Debugging, Root Cause Analysis
Tools & Workflow: Git, GitHub, GitHub Actions, Jira, Swagger, Figma, VS Code, Linux, Agile
AI Development: Claude Code, ChatGPT, AI-Assisted Development, Prompt Engineering, Code Review, Rapid Prototyping
Concepts: Data Structures, Algorithms, State Management, Accessibility, SDLC

EXPERIENCE

R-A-Ones Corporation - Software Developer Intern Brampton, ON | Jan 2026 – May 2026
Delivered 5+ production-ready application features using React, Next.js, TypeScript, and REST APIs.
Built 10+ reusable UI components to improve application consistency and maintainability.
Integrated REST APIs with authentication, validation, and error-handling workflows.
Diagnosed and resolved software and API defects through testing, debugging, API validation, and root-cause analysis.
Collaborated in Agile sprints using Git/GitHub, pull requests, Jira, and Swagger.

Frontend Developer — Freelance Projects Mississauga, ON | May 2026 – Present
Developed and modernized a production website using HTML, CSS, and JavaScript.
Implemented responsive interfaces, interactive workflows, and cross-device functionality.
Managed deployment, analytics integration, production updates, and GitHub Pages hosting.

PROJECTS

Glowi — Sports Club Management Platform React • Angular • SwiftUI • PHP • MySQL
Built a multi-role platform supporting schedules, competitions, payments, athlete results, and coach requests.
Developed 10+ responsive interfaces with validation, loading, error, and empty states.
Designed relational data structures supporting parent, athlete, coach, and administrator workflows.
Built a SwiftUI mobile application using MVVM, reusable components, and state-driven navigation.

FluiDex Drive — iOS Vehicle Management Application Swift • SwiftUI • MVVM • Core Data
Built an iOS application for vehicle tracking, maintenance records, service schedules, and reminders.
Developed reusable SwiftUI components using MVVM architecture and reactive UI updates.
Implemented Core Data persistence, validation, debugging, and application state workflows.

AI-Assisted Frontend Engineering React • TypeScript • Claude Code • Git/GitHub
Used structured AI-assisted workflows for implementation planning, code generation, review, debugging, and verification.
Evaluated generated solutions for correctness, edge cases, accessibility, and maintainability.

EDUCATION

Mobile Web Developer Diploma — Honours
TRIOS COLLEGE — TORONTO, ON | 2026
GPA: 98%
